

MERIDIAN BACK PRESSURE VALVE (MBPV)

by *Canada's Valve Specialist*

Meridian's Back Pressure Valve (MBPV) is available in a NPT threaded configuration from 1" to 4", or a wafer style carrier that fits between flanges in sizes 2" to 4" in all pressure classes (RF, RTJ, or RFxRTJ).

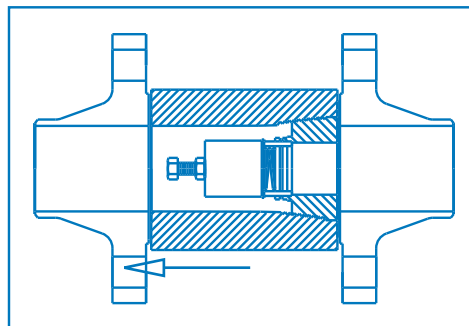

• *MBPV Threaded Style*

APPLICATIONS

- Prevent liner collapse in water injection lines
- Maintain back pressure in sales gas line of 2 or 3 phase separators or glycol dehydrators
- Bypass lines (filters, pumps)
- Vacuum breaker
- Automatic bypass for pig launcher/receiver

BENEFITS

- Adjustable Spring setting (2 to 40 psi)
- Use in any orientation
- Replaces a check valve
- Stainless steel construction for corrosion resistance
- Metal seating or soft seating
- Can be sized to specific application

• *MBPV Wafer Style*
