

Flanged Floating and Trunnion Ball Valves Threaded and Socket Weld Ball Valves

MERIDIAN™ BALL VALVES are designed specifically for the tough demands of the upstream oil, gas and hydrocarbon processing industry. These 'OilPatch' valves are reliable, built to last and competitively priced. They contain many standard features and materials that are considered 'extra' with many manufacturers. These economically priced, quality ball valves are manufactured uniquely for Meridian.

Three more reasons why you can count on Meridian as your valve supplier:

Socket Weld & Threaded Ball Valves

- ANSI B16.34 Design
- Pressure CL 800, 1500 & 2500
- Dual or triple body/stem seals
- Heavy duty construction
- Fire safe design
- NACE compliant
- Large handles

Flanged Floating Ball Valves

- Bolted 2 piece body
- Cast body in 150#, 300#
- Forged body in 600# to 1500#
- 316 ss trim
- Dual stem sealing
- Fire safe design
- NACE compliant

Trunnion Ball Valves

- Forged 3 piece body
- 316 ss trim up to 8" RP
- Seat sealant injection
- Stem sealant injection
- Fire safe design
- NACE compliant
- Lifting lugs & stands on >6" FP

These new ball valves complement the Meridian valve product line which currently includes the API 600 cast steel and API 602 forged steel gate, globe and check valves.

Call us today at 1-800-661-6997 for a free consultation on how Meridian can help you realize better valve performance.

We look forward to supplying your valve and valve automation needs!
